## THE COURTS.

BENJAMIN FITCH'S WILLS.

TWO OF THE FOUR, MADE ON TWO CONSECUTIVE

DAYS, REJECTED. The late Benjamin Fitch founded the Fitch The late Benjamin Fifth founded the Fith Home for Soldiers, at Darien, Conn., and gave away large sums for charitable and benevolent objects. He had no wife or children to whom to leave his property, worth some \$2,000,000, and in the last years of his life he showed a marked taste for making, unmaking, and adding codicils to, his last will and testament. In will dated February 16, 1880, Mr. Fitch left his house, No. 61 Fifth-ave., to Mrs. Charlotte Collender, and Eva and Carrie Fitch, all his grand-nicces, and to Benjamin Pitch, jr., his grand-nephew, for use during their lives. He also gave Mrs. Collender and Eva Fitch \$2,500 a year each from the income of the residuary estate. On the came day Mr. Fitch added a codicil to the instrument, and by this reduced the income of his grand-nices from \$2,500 to \$500. In a will of March 7, 1880, the house was left to the grand-nieces alone, while to Mrs. Collender only \$250 a year was bequeathed. Mr. Fitch made another will on February 16, 1883, and yet a fourth one the next day. In these he still further reduced the share of Mrs. Collender. In all the wills

excene the bulk of the property went to the testator's

grand-nephews, Francis and Benjamin Fitch, jr. Mrs.

Collender contested the will on the ground of testa
mentary inchancity.

Vesturies as Recorder Smith appeared for the pro-

Patrick Prendergast recovered from Noel B. Amory, yesterday, in the Supreme Court, \$1,850 for false Imprisonment on October 3, 1882. On that day Prendergast, who was foreman of the linemen of the United States Illuminating Company, saw two men on the roof of a house in Twenty-fourth-st., near Broadway, cutting the company's lines. He reported this at the company's ounce, but refused to tell the names of the men, saying:
"I would not be an informer for \$5,000." Mr. Amory,
the superintendent of out-door work, had Prendergast
arrested, and he was looked up as a suspicious person on
the order of Cartain Williams. He sought to recover
\$10,000 from the superintendent. The company was
gleo sued, but the complaint was dismissed. Thomas
Ewing appeared for Mr. Frendergast and T. H. Hubbard
for Mr. Amory. office, but refused to tell the names of the men, saying:

MEMORIAL WINDOWS IN BROOKLYN.

WHAT WILL PROBABLY BE SEEN IN THE CHURCH OF THE MESSIAH ON SUNDAY.

Two handsome memorial windows are to be unveiled to-morrow afternoon in the Church of the Measiah, at Greene and Clermont aves., Brooklyn, of which the Rev. Charles R. Baker is rector. The windows were designed and made in London, and arrived in the city a few days ago. One of them is in memory of Luther H. Donaldson, formerly treasurer and junior warden of the church. It is contributed by members of the parish and the clerks of the Bank of merica, in this city, with which Mr. Donaldson was connected. The other is to the memory of Lewis Morris, a New York merchant, who was one of the first vestrymen of the church, and it is contributed by the Sunday-school. The Domidsen window is the larger. It is on the west aide of the church and is divided by the gallery. The subject of the upper persion is a Te Deum, a choir of an

\*Assessment unpaid. \*Yseler of only a live subject of the upper pertion is a To Deum, a choir of angels singing and playing instruments. The lower portion illustrates the Parable of the Talenta The Saviour is seated on a throne with a sorfbe beside the throne. The servant is kneeling and has deposited his bag of ten talenta, while by a peculiar transpareut effect the other servant, who could not account for his one takent, is seen in the distance, as if through the window, being taken away. The window is inscribed: "Lather H. Donaldson Obit, Kov. I, 1883." It is twenty-three feet in height and is the first of a series flustrating the parables. The Morris memorial occupies only the lower half of a window. The subject treated into the three women at the tomb of Jesus. The stone has rolled partly from the mouth of the tomb and the angel is seated outside, while Mary has fallen to her knees in wonder.

The marked feature in both windows is the excellent perspective. In the Morris window the aun, partly risen, as they are for ecclesiastical purposes and not for sale. They had not been reached in the Custom House yesterday and the rector was fearful they would not be ready for Easter Sunday.

Mr. Baker said the plans for completing the tower of the church were ready, and this work, with some other changes, will be done during the apring and summer. It will cost \$25,000, part of when has been absented; the product of the micro and the series of the control of

tower will be of brick and terra-cotta built to a height of 150 feet, and will be arranged for a set of chimes, to be added subsequently. A companion tower at the northeast end of the church will also be fluished and an asse built on the Greeneave, front, the whole renembling somewhat the new St. James's Church new building at Madison-ave, and Seventy-first-st., New-York.

CONDITION OF THE COPPER TRADE.

ACTION OF THE CALUMET AND HECLA COMPANY-

NO DOUBT OF ITS SOLVENCY. The action of the Calumet and Hecla Copper Company in passing its May dividend caused slight surprise among those engaged in the copper trade in this city. All suspicions however, as to its solveney are ridiculed. The company is the largest in the country. Its first dividend was paid in 1870, and up to May 1, 1883, the total amount of dividends received by stock-holders was \$23,350,000. The capital stock is \$2,500,-000-100,000 shares of a par value of \$25. The market price at present is about \$220. Alexander Agassiz, son of Professor Agassiz, is the president. A gentleman in the city who is familiar with the affairs of the company

the city who is familiar with the affairs of the company said yesterday:

When we come to look at if from a business point of view, there ought not to be anything startling in the fact that the company has seen fit to poss a dividend. Lake Saperior navigation closes in October. Still the inlines go en preducing during the winter season. By the first of May the company find themselves with the product of six months on hand not immediately available. The company sould in this case, if necessary, have borrowed money, and having a large surplus in copper they would have been perfectly justified in doing so; but as prudent business men they doubtless concluded to wait and realize on their product instead of borrowing. While I do not know the purposes of the company, it is not unlikely that they will make up during the year the dividend just passed. I have no doubt stail that the next quarterly dividend will be paid when dae. The Calumet and Hecla is the largest company in the country. They employ 1,650 men at the mines. The product of last month was the largest ever known in the Lake Superior region, being 2,062 tons. In 1882 out of a total extracted from the Lake region of 56,000,000 pounds, this company produced 32,000,000, and in 1883 out of a total of 60,000,000 pounds their yield was about 33,000,000,000. The copper is prepared for market in ingots weighing from twelve to fifteen pounds, shipped in barrels weighing 150 pounds each, and in bars weighing 150 pounds each, and in bars weighing 150 pounds each, and in hars weighing 150 pounds each, and in hars weighing 130 pownds cach, the latter being rolled with special reference to the manufacture of wire. This wire has of late years come into great demand for electrical purposes, owing to the fact that it possesses higher conductivity than any other, being entirely free from inpurities, whereas the Montana copper contains arsente and is therefore a poor conductor. In 1879 there were about 3,000,000 pounds at lake Superior copper bars used, and in 1883 the figure

\$13,950; No. 217 to J. Withusen, and No. 215 to H. Monkow for \$13,000. James Poggi paid \$13,450 for No. 32 Mott-st.; Albert Nelsa \$12,750 for No. 30, and N. C. Drisoll \$13,200 for No. 28. B. A. Johnson bought No. 262 East Broadway and No. 249 Division-st. for \$35,100. Mr. Harnett also sold Nos. 114, 116, 118 and 1184 Divisionst., to G. W. Montgomery for \$24,700, and No. 25 Walker at. for \$23,250 to W. A. Herman. Four; lots in Ninetyninth-st., between the Grand Boulevard and Tenta-ave., were sold for \$13,050. Mr. Harnett sold at auction under forcelosure proceed-

ings the lot, 26 by 100 feet, at the southwest corner of Fifty-seventh-st, and Madison-ave. with the four-story, brown-stone house on it. The proceedings were brought by Houry H. Rogers, who is connected with the Standard Oil Company's interest against Marshall Tubotson and others. The house is a handsome one and was built in 1871 by Duggan & Crossman. It was knocked down for \$104.000 to A. P. Rogers. It is supposed to have been bought for Henry H. Rogers.

E. H. Ludlow sold fourteen lots in Ninetictu and Ninety-first sts, cast of Ninchave, eight being in Ninethelmand six in Ninety-first st., for \$601.00 to Joseph Maguire. At the sale of A. H. Muller, No. 170 West Forty-seventh-st. was bought by John H. Gerdes for \$34,000, No. 25 West Forty-sixth-st, by B. Niles for \$36,000, and the northwest corner of Fifty-sevench-st.a. 2d Park-ave, by John Compton for \$36,000. P. Wight bought the plot of land at Thirdays, and Ninety-eighth st. for \$34,350. ngs the lot, 26 by 100 feet, at the southwest corner of

THURSDAY, April 10-P. M. A stock speculation that records only 114,136 shares as the total product of its operations for a day calls for no extended comment. The sum of thetransactions is its own explanation. The market to-day opened at figures that either were equal to or better than those at last evening's closing, and then followed some fractional improvements; but there was nothing in the early advance, nor in the subsequent decline, nor in the later partial recovery, that furnished a cue even to traders who operate for 's per cent profits or losses. Union Pacific, as usual, led the list with transactions that are one-third of the day's total business; and after a rise to 7119 and a decline to 70% it finally closed as it opened, at 711s. St. Paul is second on the list, with transactions amounting to 14,900 shares, and it closed at its highest figure, which is % per cent better than the opening; that stock enjoyed the support that was derived from the company's statement of earnings, which shows an increase for the first week of April of \$27,800 on an increased mileage of 250 miles. No other stock than those named recorded sales of as much as 6,000 shares, except Delaware, Lackawanna and Western (8,700 shares of onehalf stock); it opened up is at 1211 sold up to 1215s and closed at 1211a; and Reading closed at its highest figure, 557s, or 3s higher than the opening. The theory of the speculation is that the companies having recognized the necessities of the situation by an agreement to close the mines during the whole of next week will prevent a decline in the price of coal. While such an arrangement may be of benefit to the stockholders of the Penn-

loan market reflects a small remaining short interest, to be forced in to aiding higher values. Government bonds were unusually quiet and the bids for the 3 per cents were off 12 per cent. Annexed are the closing quotations:

U.S. Cos 1531, reg. 1133, 1135, U.S. car. do: 1836, 131 U.S. car. do: 1837, 133 U.S. car. do: 1837, 133 U.S. car. do: 1837, 134 U.S. car. do: 1837, 138 U.S. car. do: 1838, 133 U.S. car. do: 1838, 123 U.S. car. do: 1838, 12

The business in State bonds was in small amounts

enstom since 1865, to-day adjoining to a.m. on Saturday's.

The foreign exchanges remain unchanged at the highest quotations. To-day's steamers took out \$250,000 gold, and the engagements for Saturday's steamers up to this hour amount to \$1,000,000. The rates for business are as follows: Bankers' bills, \$4 8734 and \$4 8934 for long and short sterling respectively; 5.1758 and 5.1559 for francs; 954s and 9534 for reichmarks; 404s and 403s for guilders.

The governors of the Bank of England attheir regular weekly meeting to-day made no change in the bank's minimum rate of discount and it remains at 2½ per cent. During the week the bank lost £366,000 bullion, but the proportion of its reserve to its liabilities was raised from 44.7-16 to 454s per cent, against 36.15-16 per cent at this date last year. The weekly statement of the Bank of France shows decreases of 11,136,000 francs gold and of 5,050,000 francs silver. The Imperial Bank of 6 fermany gained specie during the week to the Exchange, British cousols were steady and unchanged at 102.9-16 and 102.11-16 respectively for money and account. United States 4s are quoted ½ lower at 126, and the 4'9s unchanged at 115-7s. American railways generally were lower; but he declines were reflections of yesterday's home market. At Paris French 3 per cents were easier at 115-7s. American railways generally were lower; and market. At Paris French 3 per cents were easier at 115-7s. ## THE PETROLEUM MARKET.

NEW-YORK, April 10. The monthly report of the United Pipe Lines for March presents no decided change in stocks from the report for February. There was an increase of 264,128 barrels in the gross stocks, of 175,014 barrels in the sediment and surplus account and of 89,114 bar-

Elsewhere the clearances were: Oil City, 11,624,000; Bradford, 9,190,000; and Pittaburg, 12,452,000 barrels. The refined market is little improved, but quotations to-day were advanced by of a cent to 81e cents per gallon in New York and 84e cents in Baitimore and Philadelphia. BRADFORD, Pesn., April 10.-Crude oli firm; total runs Wednesday, 63,209 bbls.; total shipments, 51,038 bbls.; charters, 35,075 bbls.; clearances, 11,368,000 bbls. United Pipe Line certificates opened at 93½ and closed at 93½; highest price, 94½; lowest, 92½.

EUROPEAN PRODUCE MARKETS.

dem sylvania Coal Company, who have no first charges between the net earnings and dividends on their stock, such companies as Reading and some others forego the creation of assets upon which money may be raised to meet pressing engagements. The situation of the coal companies is not far different from what it was in the spring of 1876, an increased capacity with its attending cost with a declining demand for consumption. Taking the market as a whole, it closed at better figures than it did last evening, but the dealings indicate little disposition to trade on either side of the account, and the stock

THE CHICAGO BEARS IN TROUBLE. GRAIN AND PROVISIONS GOING UP-THE MARKET

IN A WHIRL.

IBY TELEGRAPH TO THE TRIBUNE.

CHICAGO, April 10 .- There is no session of the Board to-morrow. Traders are to-night buying and sell-ing privileges for Monday, evidently anticipating a dail time Saturday. "Puts" and "calls" indicate that the crowd look for a little easing up from the pressure which the markets have been under for two days. The curb to-night was considerably under the "call" close, May wheat selling at 85½ cents. May cern at 50 and May pork at 17.45. All sorts of produce closed higher than last night. The principal interest centered about the provision pit where, although the trading was small, the excitement where, although the trading was small, the excitement was great. The owners of log products, who kept quiet all through the decline are now showing their hands. "It is not possible to buy pork," said a trader. "The 'shorts' have sold themselves into a hole. Armour, Plankinton and Cudahy have quietly absorbed all the low-priced options during the recent break, have sold their cash property in enormous quantitiesand have taken all the contracts that the Chicago Pack ing Company offered. The situation now is that Sanger and the Packing Company are short probably 75,000 barrels of pork, perhaps more, and there is no pork for sale. A purchase of 100,000 barrels sent the figures up this morning twenty-five cents a barrel. The shorts are in the hands of the triumvirate. They'll get no sympathy, either. They made a little money on the bear side and

became uncudurable."

David Dows & Co., and Rovert Warren & Co., created a furry in the usually complacent rye crowd this foreuced by builling the price of the May option 2 cents. There is said to be no special pressure from shorts, but there were some shipping orders in to-day. The real reason, however, for the advance is said to be the desire on the part of the holders to influence the New-York market. There was not acarly so much talk about the Milwaukee syndicate this morning as yesterday. The bright weather had dissipated some of the fear felt by the shorts, and there were no signs in the pit of any effort by anybody to sustain prices. The cables came in weak, as usual. Under a general sort of selling the market cased off a full cent. May wheat opened at \$5½ cents, and dropped to \$4.5%. There was a rumor of a failure in the trade in Boston, and this did not strengthen prices at all. The feeling about the wheat pit at this moment appeared to be uncertain. Sellers were not so fearless, for some of them had suffered not all trie from the squeeze of yesterday. The market at 11 o'clock acted as if ready either to advance or to decline upon small provocation. After the provision friunvirsite began to work about the little pit, grain began to rise. The excitement of the shorts soon exceeded anything exhibited by them yesterday. The sellers of the morning numbled over each other in their anxiety to get back their contracts. Al 1:10 p. m., wheat the last trader left the wheat pit, the May option was going at \$5% cents, and June at \$7%, the highest price touched since the tumble a few days ago to \$0 cents. On the call it touched \$6 cents. The situation was going at \$5% cents, and June at \$7%, the highest price touched since the tumble a few days ago to \$0 cents. On the call it touched \$6 cents. The situation was about the same around the corn pit, although there has been no talk of a clique in this grain. The new came from \$1. Louis that the receipts were small, less than 100 cars, but this simply offset the influen became uneudurable." David Dows & Co., and Rovert Warren & Co.,

THE OFFICIAL CROP BEPORT.

WASHINGTON, April 10 .- The April returns of the Department of Agriculture make the winter wheat area about 27,600,000 acres. This is nearly the breadth sown of the previous crop, of which between 5 and 6 per cent was subsequently ploughed up, leaving 26,400,000 acres to be harvested. Comparing with the area barvested, the present breadth is an increase of 5 per cent. The present area is greater than that of the census year by more than 2,000,000 acres. The increase is about 1,500,000 acres on the Pacific coast and nearly 750,000
